Permlight Announces Record Revenue and Profitability

LED Lighting Systems Company Kicks Off Third LightItUp Conference with Record Turn Out

Fernando Lynch Joins Permlight as VP of Sales

Tustin, CA - 10/6/2005 – Permlight Products announced that it continues to see greater than 200% revenue growth and record profitability. “We recently shipped nearly one hundred (100) miles of our White Twiste™ LED lighting system to light the rebranded Sprint/Nextel logo and the conversion of Bank1One banks to the CHASE bank brand,” commented Manuel Lynch, President and CEO of Permlight Products. “We attribute our rapid profitable growth to our leading position in the sign industry and to our diversified market strategy of serving theaters and performing arts centers, retail and residential lighting, boating/marina and outdoor lighting applications. We are having great design win success in all areas.”

Recent wins in the residential new construction market have placed Permlight LED systems in new home tracts throughout Southern California. The first homes incorporating the company’s Enbryten line of pathway, under cabinet, and recessed down lights have move-in dates before the end of 2005.

Permlight also announced that it was kicking off its third LightItUp LED Systems application conference this weekend with record turn out of more than 150 companies. The event, co-sponsored by Cree, Nichia, Osram and Underwriters Laboratory, is an invitation only conference targeted at exploring the vast and varied applications where LEDs are used and how to assess the payback for an LED system in end applications. This third event is being held on a cruise to Baja Mexico. Past events were held on Catalina Island and in Palm Springs.

About Permlight

Permlight, a premier provider of energy efficient LED lighting solutions, designs and manufactures LED Lighting Systems and power supplies for indoor and outdoor applications. With its patented thermal management technology, the company provides products that are rated as the brightest and most cost effective systems in the industry. Permlight’s patented dispensing and peel and stick installation systems also make it the easiest system to install.
